

Technical Services

Tailored, cost effective laboratory equipment supply and service packages.

Installation & Commissioning with IQ/OQ Validation

We are experienced in the installation, set-up and relocation of a broad range of technical laboratory equipment. We offer expert qualification, compliance and validation for new, installed, moved or altered equipment.

Preventive Maintenance / Servicing

We offer preventive maintenance and servicing contracts on a wide range of laboratory equipment. Detailed service reports are provided along with recommendations on how to achieve ongoing cost and performance efficiencies.

Repair/ Breakdown Response

We offer a rapid response emergency service nationwide with a rapid turnaround on equipment repairs. Our repair service is performed in accordance with our stringent fault logging / corrective action procedures and quality verification.

Calibration

We offer accurate, timely and documented calibrations on a broad range of laboratory equipment. Calibrations are completed using equipment traceable to national and international standards accredited to NML, UKAS, NPL and NIST. Certificates are issued in hard and soft copy format.

LabService Providers complement our product portfolio with a suite of tailored service solutions. Our services range from needs analysis and consultancy to equipment sourcing, supply, installation and validation. All of this is augmented by a selection of flexible service level contracts to meet a range of calibration, maintenance and repair requirements.

Our service personnel have over 20 years' experience of leading technologies across all the principal equipment and instrumentation manufacturers.

Our bespoke services are brand independent, flexible, competitively priced and efficiently delivered nationwide.
